

Recharge & Voucher Management Solution

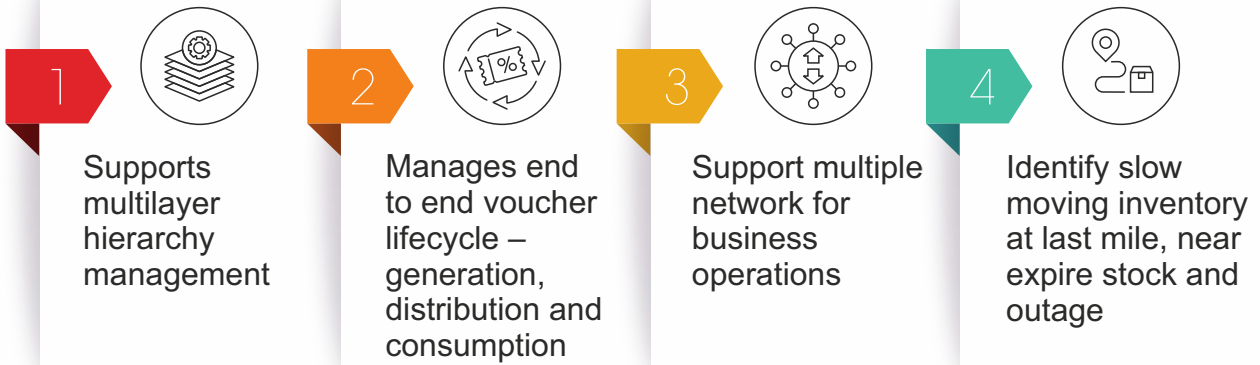

Comviva's PreTUPS™ VMS is most comprehensive voucher management system with Physical and digital voucher. PreTUPS™ VMS enables operators to manage & track end to end life cycle of vouchers starting from product management, voucher generation, distribution and consumption.

How does it work?

Key Features

Digital Voucher Recharge and Choice Recharge

PreTUPS VMS solution provide the flexibility to the subscriber to perform the recharge themselves through access bearers like SMS or USSD. Service provider can create differential benefits on the same denomination. Ex: Subscriber can choose a \$10 data voucher or \$10 talktime voucher based on their need.

Voucher Lifecycle & Voucher expiry date extension

PreTUPS manages end to end voucher lifecycle – generation, distribution and consumption. Expiry date of the voucher can be modified post generation and distribution

Mobile app and Offline Mode

PreTUPS's retailer mobile application can be used to distribute the digital through SMS or print it by connecting to a Bluetooth printer. The channel users can use this app to download the digital voucher in their device and later distribute when they are not connected

Digital Voucher Recharge and Choice Recharge

PreTUPS provides features to support retailers to distribute digital vouchers as gift cards

Our Success Story
